

## Early Journal Content on JSTOR, Free to Anyone in the World

This article is one of nearly 500,000 scholarly works digitized and made freely available to everyone in the world by JSTOR.

Known as the Early Journal Content, this set of works include research articles, news, letters, and other writings published in more than 200 of the oldest leading academic journals. The works date from the mid-seventeenth to the early twentieth centuries.

We encourage people to read and share the Early Journal Content openly and to tell others that this resource exists. People may post this content online or redistribute in any way for non-commercial purposes.

JSTOR is a digital library of academic journals, books, and primary source objects. JSTOR helps people discover, use, and build upon a wide range of content through a powerful research and teaching platform, and preserves this content for future generations. JSTOR is part of ITHAKA, a not-for-profit organization that also includes Ithaka S+R and Portico. For more information about JSTOR, please contact [support@jstor.org](mailto:support@jstor.org).

THE INFLUENCE OF ASTRONOMY ON  
MATHEMATICS

## CONTENTS

### *The Influence of Astronomy on Mathematics:*

PROFESSOR F. R. MOULTON ..... 357

### *Statistics of German Universities:* PROFESSOR

RUDOLF TOMBO, JR. .... 364

*Memorial to Charles Otis Whitman* ..... 365

*Scientific Notes and News* ..... 366

*University and Educational News* ..... 370

### *Discussion and Correspondence:—*

*The Use of Numerals for Specific Names in*

*Systematic Zoology:* PRESIDENT DAVID

STARR JORDAN. *The Use of Symbols in*

*Zoological Nomenclature:* A. ARSÈNE GIR-

AULT. *On Factors Contributing to a Low*

*Scientific Productivity in America:* PRO-

FESSOR R. S. WOODWORTH. *Biological*

*Teaching in Secondary Schools:* W. L. W.

FIELD ..... 370

### *Scientific Books:—*

*Osborn on Questioned Documents:* PRO-

FESSOR JUNE E. DOWNEY. *Bowles's Tables*

*for the Determination of Rocks:* R. W.

CLARK ..... 379

*Scientific Journals and Articles* ..... 380

### *Special Articles:—*

*A Kinetic Theory of Gravitation:* DR.

CHARLES F. BRUSH ..... 381

*American Society of Zoologists—Eastern*

*Branch:* DR. RAYMOND PEARL ..... 386

*The American Association for the Advance-  
ment of Science:—*

*Section D:* PROFESSOR G. W. BISSELL .... 392

THERE are probably many reasons why the members of the eleven sections of the American Association, representing at least fifteen sciences, have united in a single society. One of these is undoubtedly that the mingling of men of varied chief interests, points of view and methods of work has at least a tendency to correct those intellectual provincialisms which are characteristic of isolation, and to show how wide and how rich is the field of scientific activity. While it is unquestionably advantageous on some occasions for narrower groups of men whose interests are more nearly common and whose scientific activities run more nearly in the same channel, to meet apart for the consideration of their own special problems, yet on the whole the benefits to be derived from occasional joint meetings are so great that it is earnestly hoped the American Association will prosper in the future even more than it has prospered in the past, and that the individual scientific societies will not cease to cooperate with it.

If it is agreed that there are real benefits to be derived from an association of many distinct scientific societies, it will equally be granted that some advantages may be obtained from a meeting where so many points of view, modes of thought, and methods of investigation are represented as among the members of Section A. These diverse, and in some cases conflicting, points of view have arisen from the narrow specialization of recent times, and from the fact that the bounds of our knowledge have extended more rapidly

MSS. intended for publication and books, etc., intended for review should be sent to the Editor of SCIENCE, Garrison-on-Hudson, N. Y.
